

ChildMINDER® – Baby & Child Tagging

The ChildMINDER® band, designed specifically for its intended use.

Are you looking to enhance the security of your **MATERNITY WARDS, CHILDREN'S WARDS** or **CRÈCHES**?

Are you fed up with your existing system failing you? Is it complicated or inefficient?

Could your current tags pass on infection?

Our baby band and associated alarm system represents a major advancement in newborn and paediatric hospital security. It is the only system available today that addresses the following with equal focus:

- INFECTION PREVENTION
- IDENTITY CONTROL and
- SECURITY CONTROL

Unlike other products in the marketplace the baby band system is extremely **cost effective** and has been designed **specifically** with **clinical practicalities** in mind. It:

- is **fully** disposable thereby **eliminating all risk of cross-contamination** baby-to-baby, totally guaranteeing hygiene (most competing products have at least one non-disposable element where adequate sterilisation is by no means an absolute certainty)

- uses tried and tested alarm technology which has been in use for over 20 years
- is supported by a simple database solution to enable secondary identity verification and to ensure that no bands can be utilised on more than one baby
- is practical and straight-forward meaning that staff can focus on their core roles

Being made from strong plastic the band is secure enough to prevent and deter removal in its intended environment up to a certain reasonable point, whilst also having the following essential and unique characteristics. It is:

- Comfortable, durable, lightweight & flexible
- Fully adjustable, even after fitting
- Locked and unlocked using a key, avoiding the risk of using scissors for removal
- Deadlocked to prevent over-tightening
- 100% waterproof
- Streamlined with no sharp edges
- Smooth and non abrasive, hypoallergenic
- Stamped or labelled with a unique alpha-numeric ID, which is linked to correspond exactly with the mother's records
- Sized specifically to prevent strap protrusion

We would be delighted to provide further details of our wristband for review upon request. Please call us on **Tel: 0151 906 1977** or visit our website.
