- **INCREASE CUSTOMER LOYALTY & GET VALUABLE CONSUMER DATA**
- **BECOME LEADERS IN ADDRESSING CORPORATE-SOCIAL RESPONSIBILITY**

Why consider this?

A child goes missing in the UK every 5 minutes on average, mostly from public places. That's 100,000 children per year. Most of the time these kids leave accidentally, through their own mischief, through excitement or by mistake; but unfortunately 10% of missing children in the UK are never found and therefore consumers are very sensitive to these issues.

www.childminderuk.com

What is it?

- A state-of-the-art re-usable reinforced wristband, locked comfortably but **securely** to a child to prevent them from removing it
- Optional alarms installed at perimeter points to prevent children leaving a venue
- Parental ID tags matched to a child's ID no. prior to a wristband being removed
- High quality but extremely cost effective, easy to install & operate
- Uses totally tried and tested technology. Unlike others, it is **not** a costly or complex RFID/Wi-Fi location-tracking system
- Full-proof parental disclaimer process

Where can we install it?

Anywhere! Venues can be large or small! For example: shops, shopping complexes, play arenas, crèches, swimming pools, leisure complexes, concert halls and community centres.
